## FREE LECTURE AT COWICHAN CAMPUS

UNLOCKING THE SECRETS  
OF THE  
FRANKLIN EXPEDITION

The mystery of the ill-fated 19th century Franklin Expedition to the Arctic is explained by forensic anthropologist DR. OWEN BEATTIE.

On June 29, 1981 a team working with Dr. Beattie discovered part of a bleached human skull. That was the start to unravelling the mystery of Sir John Franklin's expeditionary force which set out (1845-48) to sight the Northwest Passage. However, starvation, scurvy and cannibalism marked the end of their journey.

138 years after their deaths three well-preserved bodies were exhumed from the permafrost of Beechey Island. Of the 20-year-old Chief Stoker John Torrington's body Beattie says "It's as if he's just unconscious." Ironically the cold that tragically ended the expedition also preserved its secrets for discovery by a future generation.

TIME: 3:00 - 4:30 PM

DATE: FRIDAY, JANUARY 13, 1995

LOCATION: Room 154/155, Cowichan Campus

This lecture is free and open to everyone and there is no need to register.
