

# B.C. Adolescent Health Survey

The survey asks adolescents about...

In order to have...  
 Healthy, Safe, Supportive Environment  
 Healthy Growth and Development

Adolescents need...

**BCAHS for NURS314**  
 For our community of practice placement, we work alongside public health nurses to administer the McCreary Centre Society's B.C. Adolescent Health Survey to students in grades 7-12.

Some of the inquiry questions that we have are:

- What are the needs of the community?
- How does active parental consent and student assent affect the accuracy of the BCAHS results?
- How are the results of this survey different from the last survey done in 2013?
- What policy changes are required to meet the needs of this specific age group?
