FREE FILM

GODDESS REMEMBERED is next in the Free Film Series. This is a documentary exploration of the goddess-centred religions of Western Europe, beginning around 35,000 BC when the life forms of the earth and female were revered. In prehistoric times women were respected as the source of life, wisdom and justice. The film raises interesting questions about

historical misreadings and misinterpretations of archaeological data as well as the connections between today's environmental crisis and the loss of the goddess culture.
